Summary of the most important topics mentioned on the PTE
DOK meeting

4 Jul 2019

info@phdpecs.hu

Relevant agenda items

- Approval of the PTE DOK's 2018 Budget Report
- Report of the Presidential Commissioner of the PTE DOK Stipendium Hungaricum Program
- Report on the DOSZ Leadership Training
- Consultation on the organization of the MedPECS Conference 2019

Approval of the PTE DOK's 2018 Budget Report

The Organization's Vice President for Economic Affairs said that the report, which was sent in writing, was prepared on the basis of data recorded by the Chancellery. Expenditure is basically divided into two parts: unit-managed expenditure and then centrally managed expenditure. All in all, the Doctoral Student Association conducted responsible management in 2018 and closed with a significant positive value compared to the plan.

Report of the Presidential Commissioner of the PTE DOK Stipendium Hungaricum Program

Ala 'Salem Abdelfattah Ahmed said she has been in this position since January 2019. In her opinion, the forum organized for foreign PhD students provided a great opportunity for students to learn about their opportunities, scholarships, and to get to know the functioning of the Doctoral Student Association a little bit better. She added that it was a very good idea to have an English compass that provided a lot of useful information to each of them.

She said that she kept in touch with foreign students during her work and kept them informed about important information, trying to channel common problems.

Report on the DOSZ Leadership Training

The president of the organization said that the leadership training, which was organized jointly with the National Association of Doctoral Students, took place between 21 and 22 June 2019 in Pécs. The attendance rate was extremely high from both the Doctoral Student Self-Government and the Science Departments. Feedback from all participants was positive in terms of content and organization.

Consultation on the organization of the MedPECS Conference 2019

The organization's vice president for science said that the event will be held this year on November 9, 2019 and will be hosted by the Szentágothai John Research Center, just like last year. He added that I wanted to maximize the attendance of the conference by 100 people.

Registration is expected to open in August, and a web page for this and the publication of further information is already on the way. He says that this year, the abstract volume will be in digital form. The identity of the plenary rapporteur has not yet been clarified.
